INSPECTOR: Yatee Patel - REHS

A complaint was recently received by our Department alleging violations of the California Retail Food Code at this facility. In response to the complaint, an inspection of the facility was conducted and our investigation findings are provided below. If violations are noted, then appropriate corrective action is required as listed in the main section of this report. Thank you for your cooperation. One reinspection will be conducted (if needed) at no charge. A service fee is assessed for each additional reinspection required.

Inspection Findings and General Comments:

Today's inspection was prompted due to an alleged complaint from a customer who ordered a hot sandwich and found a "metal" piece inside.

Findings:

The restaurant uses canned items - The can opener appeared to be well functioning. The operator does not think it was a can shaving, because all the items used from canned food are usually toppings for the pizza. The operator suspected the metal dish scrubber may have accidentally be left in the containers that are cleaned and are used for storing the deli sandwich ingredients. The complainant stated it was a hard metal like object. The findings are inconclusive.

Asked operator to be careful using the can opener and other non food items and educated the cooks on how to avoid physical contamination.

Thank you

General Comments:

The facility has made their dining completely inaccessible to customers and is encouraging customers to call-in their orders to minimize their wait.

At this time all food sales are for DELIVERY or TAKE-OUT/PICK-UP ONLY!!

The staff is practicing social distancing by requesting that customers keep apart a minimum of six feet from each other and staff. Only allow entry to customers that can safely keep the same distance between them while they wait or encourage them to wait in their cars.

Staff is practicing safe food handling procedures to protect food from contamination, monitor hot & cold holding temperatures, and WASH HANDS.

Staff uses sanitizing solution (chlorine 100ppm or QAC 200ppm) for wiping down all counters and work surfaces to reduce the risk of contamination. All work surfaces should be cleaned and sanitized frequently to prevent contamination.

Under no circumstances are employees who feel sick or are sick with respiratory (i.e. fever, coughing or sneezing) or gastrointestinal (i.e. vomiting or diarrhea) symptoms are allowed to work in the facility.

An investigation was conducted today to review and verify the above food and employee safety practices are being followed. A copy of this summary will be emailed to the facility operator. Please contact our Department for further questions.
