An inspection of your facility revealed the following violations of the California Health and Safety Code and/or California Code of Regulations. A reinspection may occur at any time to verify correction of these violations. Please note the date of correction as listed per violation.

NVO = No Violation Observed OUT = Out of Compliance N/A = Not Applicable COS = Corrected On Site UD = UD

Overall Inspection Comment:

Follow-up inspection on this date with Ellyn Helm. The hot water at the three compartment sink wasn't reaching 120°F during the previous inspection in a sufficient amount of time. Repairs were made this week. The water at the three compartment sink now reaches the temperature of 120°F in less than one minute. No further action is warranted.

ATTENTION: There are a total of 0 item(s) marked above in violation. Total Major violations are 0.

An inspection of your facility revealed the following violations of the California Health and Safety Code and/or California Code of Regulations. A reinspection may occur at any time to verify correction of these violations. Please note the date of correction as listed per violation.

NVO = No Violation Observed OUT = Out of Compliance N/A = Not Applicable COS = Corrected On Site UD = UD

Violation Status	Violation Code	Observation
FDA Food Code 2017		
☐ NVO ☐ UD ☐ NA ☒ OUT	50 - PHYSICAL FACILITIES - Hot and cold water available, adequate pressure	
Upon entering the kitchen, there was a large puddle of water on the kitchen floor. This occurred because of the amount of time it took for hot water to reach the kitchen from the outside boiler and the drains could not keep up with the amount of water going down the drain. Sometimes the water takes up to 15 minutes or more to reach a temperature of 120°F. In 2024, repairs were made to the boiler because the water wasn't reaching a temperature of 120°F. It was repaired at that time. The boiler is very old. The maintenance person said they are waiting for a part from PG&E to hopefully correct the problem. A reinspection will be needed to confirm that water is reaching the temperature of 120°F in the kitchen in an appropriate amount of time. Should this not work, a longer term solution for hot water will be necessary. Please be aware that excessive water on the floor is a safety hazard and may cause someone to slip and fall.		
☐ NVO ☐ UD ☐ NA ☒ OUT	51 - PHYSICAL FACILITIES - Plumbing installed, proper backflow devices	

Overall Inspection Comment:

Inspection on this date with Ellyn Helm. All hand wash sinks were stocked with paper towels, soap and hot water. Water at the three compartment sink reached a temperature of 120°F or above. All refrigerators maintained a temperature of 41°F or below. Food in hot holding areas maintained temperature of 135°F or above. Food was stored 6 inches above the ground. The food manager safety certificate expires June 5, 2025.

Menu for today: chicken patty, mini cheeseburgers, tuna, sandwich, chili, cheese dog.
