INSPECTION REPORT

FOOD VENDING PERMIT - GR7 (>1 mil)

Observations from today's routine inspection,:

Hand wash sinks are located throughout the facility in easily accessible locations. All have warm water reaching 100F, soap, and paper towels.

All refrigerators measured below 41F. Service bars above reach in refrigerators use time for public health; all items are marked with the date/time of preparation and discard.

Food in refrigerators is observed in covered or sealed containers. Meats are observed thawing in a pan on the bottom shelf. Foods are organized to prevent potential contamination. All food is stored at least 6 inches off the ground. Lights are installed and covered to provide adequate lighting.

Hoodrange observed free of debris and grease build up.

Some of the tiles in the kitchen (in front of the deep fryers) are cracked or missing altogether. Please have these replaced, as the space can be a fall hazard and creates an area difficult to clean, which may result in mold or mildew growth in that space.

Dishwasher is used for all dishes. Sanitizer (QT) is used in the cycle.

Floor sinks are observed free of debris build up.

Restrooms are observed clean with warm water, soap, and paper towels.

The 3-compartment sink is used only to remove food particles from dishes. All dishes go into the dishwasher where they are sanitized.

The hot water at the prep sink and 3-compartment sink initially reached only 108F. This was corrected on site with the water heater being turned up. Please make sure to keep the water heater to a setting which will allow hot water at 120F for all operational hours.

In the storage area containing the water heater, a bulk carbon dioxide tank was observed. Bulk tanks exceed the reporting requirements for hazardous materials (carbon dioxide reporting threshold is 1000 cubic feet; the bulk tank observed hold approximately 3600 cubic feet). This facility is required to file and maintain a hazardous materials business plan in the California Environmental Reporting System. I will provide templates for the business plan and individual training/assistance with the initial filing. Please contact me with any questions or to schedule a meeting to go over the hazardous business plan requirements.

Please address the above noted concerns within 30 days and provide documentation to our department to verify compliance.

ATTENTION: There are a total of 0 item(s) marked above in violation. Total Major violations are 0.
