Violation: None Noted

General Comments:

A complaint (CO0009961) was received by this department on Aug. 31. 2020 alleging a customer observed live cockroaches along the front counter. The complainant provided two photographs showing the pests. An investigation into this matter was made today. Upon arrival, I discussed the matter with onsite manager, Jeremy Martinez. Mr. Martinez confirmed the facility was experiencing an ongoing problem with the cockroaches at this time. Mr. Martinez proceeded to contact another manager more familiar with the situation.

After discussing the matter with the other manager, Mr. Martinez informed me the facility was being treated by Clark Pest Control every two weeks as a means to help eliminate the problem. Typically, pest control service is a once a month treatment.

A general inspection of the premises was performed today. No evidence of either live or dead roaches was observed. In general, the observed facility sanitation level of the facility was determined to be satisfactory.

Continue to maintain the enhanced pest control service and maintain a clean facility to ensure the problem is in fact eliminated.

One reinspection will be conducted (if needed) at no charge. A service fee is assessed for each additional reinspection required.

Violation: IMPROPER MAINTENANCE OF HANDWASH FACILITIES [HSC 113953 - 113593.2]

Description/Corrective Action: The paper towel dispenser at the food prep area handwash sink was empty. An employee agreed to restock the dispenser upon notification.

Violation: IMPROPER MAINTENANCE OF HANDWASH FACILITIES [HSC 113953 - 113593.2]

Description/Corrective Action: Hot water supply to both the men's and women's restrooms is not readily provided. Hot water supply to both restroom sinks are tempered and typically stay on for no more than 30 second cycles. Upon first testing the women's restroom sink hot water supply, it took no less than 5 cycles (at least 2 1/2 minutes) before warm water was provided. The men's restroom took no less than 3 cycles to get warm. Hot water at a temperature of no less than 105 F should be provided within a minute of running water supply. If needed, a hot water recirculation pump should be installed.

Violation: OTHER PERMIT VIOLATION

Description/Corrective Action: Neither the men's or women's restrooms were provided with employee handwash notification signs. Install the required signs in each restroom.

General Comments:

All monitored hot and cold food storage temperatures met State Food Code requirements.
The food handling practice observed was good. All food handling employees were wearing disposable gloves.
The facility is actively taking daily food temperatures for logging purposes.
Overall, the facility was observed to be in satisfactory operational condition.

Of note, a random review of some employee food handler cards showed they were expired. If the employees with expired food handler cards are no longer working at the establishment, remove the expired cards or dispose of them. If those employees with expired cards are still working at the establishment, ensure those employees obtain updated food handler card certifications. Update your file record so that it is current.
